The diagram illustrates the relationship between three linear equations and their corresponding matrix rows. On the left, three equations are listed:

$$\begin{aligned} a + b + c &= 0 \\ a + b + 2c &= 0 \\ a + b + 3c &= 0 \end{aligned}$$

Below these equations is a 3x3 matrix representing the coefficients:

1	1	1
1	1	2
1	1	3

On the right, the equations are manipulated to show a dependency. The first equation is added to the third equation:

$$\begin{aligned} &a + b + c = 0 \\ &+ \quad a + b + 3c = 0 \\ \hline &2a + 2b + 4c = 0 \end{aligned}$$

This result is then divided by 2:

$$\downarrow \div 2$$
$$a + b + 2c = 0$$

Blue arrows indicate the flow of information: one arrow points from the first equation to the first equation in the manipulation, another from the third equation to the second equation in the manipulation, and a third from the matrix row [1, 1, 2] to the final result $a + b + 2c = 0$.
